

What if taking a phone call while away from the office was like you never left?

With Zulu, your office phone can travel with you in your computer bag.

Sangoma's Zulu UC is the ultimate Desktop integration tool that improves work place communication between on-site and remote workers, and ultimately their productivity.

Designed for FreePBX and PBXact Phone Systems, Zulu plugs into your current infrastructure and guarantees that you will always have all the tools you need with you, while away from the office.

Look at some of the features you get with the freedom to make phone calls from your laptop:

**KEEP YOUR OFFICE
PHONE WITHIN REACH**

Whether you are in the office by your desk phone or on the go with your laptop, Zulu Soft Phone keeps you connected so that you never miss a call

**CHAT LIVE WITH YOUR
CO-WORKERS**

Enhance team communication and Project collaboration with built-in chat rooms and one-to-one messaging.

**INTUITIVE CLICK-TO-CALL
ON WORKSTATION APPS**

Never worry about your cell phone reception or charge! Zulu lets you click-to-call from web browser, Outlook Email client and CRM Help Desk.

**KNOW WHO'S CALLING
WITH SCREEN-POP**

Reduce call times and Impress your customers by automatically displaying account details as soon as the call comes in.

Unified Communications that works for your Business

With more and more employees working at remote locations, and travel being a necessary function, communication is more important than ever.

The all-in-one Softphone is at the core, it combines calling, chatting, SMS and Fax into one interface.

INTEGRATED SCREEN-POP

For customer service personnel Zulu makes your life so much easier with integrated screen-pop which automatically opens customer accounts on inbound calls. This helps you cut down call times as well as providing your customers with a better customer experience.

ZULU KNOWS WHEN YOU'RE IN THE OFFICE

A vital feature of the Zulu Softphone is that it knows when you are in the office, so that you can use your desk phone. It also knows when you are out on your mobile station, so that you never miss a call.

TEAM COLLABORATION WITH BUILT-IN CHAT

Team Collaboration is a key focus of Zulu with built-in chat, keeping all remote workers connected in real time and enhancing productivity. Staff members can create Team rooms for on-going project discussion and/or send one-to-one messages for quick response, all without needing to pick up the phone.

UNIFY COMMUNICATION WITH CLICK-TO-CALL

Zulu helps you further unify your communication onto your mobile workstation with click-to-call. No longer do you have to remember phone numbers or pull out your Cell Phone or copy & paste numbers into a softphone, simply click the number, where you see it and call! You won't believe how much time this saves. Click-to-call deeply integrates into your popular applications, such as browsers, email clients and CRMs.
