

Sangoma talk

Intuitive and Easy to Deploy

Allow staff to work remotely using the Sangoma Talk Mobile app for iOS and Android devices. Employees can enjoy voice using their business extension, while keeping their personal device information private.

The intuitive onboarding process sends an auto-generated email to each user upon activation from Sangoma portal with simple instructions for them to download the app with instant log-in. It's as simple as that!

Secured Communications

Sangoma Talk users are protected by TLS/SRTP encryption which means their phone calls are kept private while on cellular or WiFi connections, and your business is secured from any unauthorized connections.

Features Included

Audio & Video Calls using your Business Extension

Make and receive calls using your mobile device, while protecting your personal phone number, using mobile data or WiFi connection.

Do-Not-Disturb (DND)

Silence all inbound business calls when you don't want to be disturbed using the scheduling feature for automatic behavior.

Voicemail

Receive business voicemail directly to the app, allowing users to quickly listen to calls they have missed.

QuickDial with BLF

Create a list of favorite contacts for easy access with BLFs (Busy Lamp Field) that also show the current status of your colleagues.

Powerful Call Control

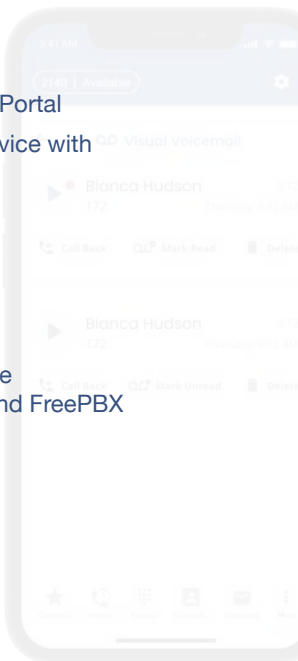

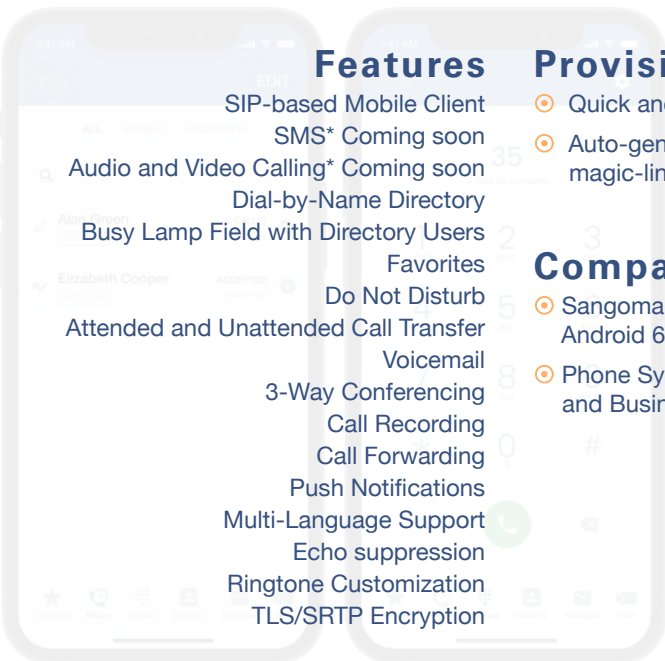

Users can blind & Warm transfer calls, record and have 3-way conversations.
